

Disc grinder for micro-joint removal

MiniSpin Joint

Easy, quick and safe removal of micro-joints

Parts with micro-joints are always pushed 90° to the grinding disc which avoids irregular rounding of the edge. The safety plate is adjustable in height to leave a small working area. The cutting speed is faster near the outside and slower nearer to the centre of the disc. This makes it very easy to handle heavier or lighter micro-joints.

Technical Details:

- Motor 0,75 kW
- Softdisc D=250mm with soft pad and hook cover (for velgro covered discs)
- POM table 90° to the disc, shaped into a narrow and a wider part
- height adjustable safety cover
- ON/OFF switch with emergency push button and socket
- dust connection outlet D=60mm at the back of the machine
- Weight: appr.. 125 kg
- L X B X H: 550mm x 550mm x 1300mm
- 400V, 50 Hz, 3P
- CE
